The terminal disclaimer filed September 4, 2003 is acceptable and the obvious double patenting rejection set forth in the office action mailed July 10, 2003 has been withdrawn.

Upon reconsideration by the examiner the finality of the office action mailed July 10, 2003 has been withdrawn and the following new grounds of rejection have been set forth.

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

The last page of the oath which includes the inventors names, address and signatures is missing.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 8,9,19,20,28,29 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 8,9,29,20,28,29 of prior U.S. Patent No. 6,498,946. This is a double patenting rejection.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 21-29 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. A pulse sequence is considered to be a type of signal which does not encompass any of the statutory categories of invention. Applicant's attention is invited to MPEP 2106 which states "Claims that recite nothing but the physical characteristics of a form of energy, such as a frequency, voltage, or the strength of a magnetic field, define energy or magnetism, per se, and as such are nonstatutory natural phenomena. O'Reilly v. Morse, 56 U.S. (15 How.) 62, 112-14 (1853)."

Claim Objections

Claim 13 is objected to because of the following informalities: In claim 13, "the sequence" lacks antecedent basis. Appropriate correction is required.

Allowable Subject Matter

Claims 1-7,10-12,14-18 are allowable over the prior art of record.
